Entrepreneurship Cell (E-Cell)

Entrepreneurship Cell (E-Cell) committee of the college is dedicated to fostering a vibrant culture of innovation and enterprise among our student community. Our mission is to empower the next generation of visionaries, providing them with the platform, skills, and connections to transform groundbreaking ideas into tangible realities.

E-Cell is committed to driving this mission through several key initiatives:

1. Conducting Workshops and Sessions:

In the workshop, the committee will discuss the information to the students about how to build a plan, how to raise funding, and a marketing plan, and organize a workshop with an expert to provide more details on such topics.

2. Organizing a competition among the students for the best business ideas, and students will get a prize for their best idea.

3. The committee will try to invite successful entrepreneurs and industry leaders so that students can directly connect with them.

4. Motivating the students to engage in an internship program.
